Who we are?

The Benstone Group Inc. is an investment management firm that primarily focuses on investments in the real estate sector. What we do?

The Benstone Group has purchased loan pools in every major US market over the past 10 years. Our most important activities in this area however, include REO and loan valuation services and developing pool acquisition strategies. We work with hedge funds, high-net worth individuals to invest in REO and loan pools. We also work with investors on management and the sale or liquidation of the pools.

PURCHASES AND SALES OF LOAN POOLS

We provide advice or detailed recommendations to clients on the purchase or sale of pools. This includes timing issues, price points, bidding strategies, negotiations, etc. The firm has been in trading situations many times before and thus we have a clear picture of the purchase or sale process.

Understanding the process even when there are changes to the normal implementation allows us to focus on the key issues that are important to the success of the purchase or sale.
